Experience

Machine Learning Engineer 2, HP

- Developed anomaly detection alarms for time series data from worldwide semiconductor manufacturing facilities
- Coordinated research project with university on predicting product manufacturing times
- Developed Model Context Protocol (MCP) tools to enable agentic AI workflows

February 2026 - Present
40 hours per week
Corvallis, OR

Machine Learning Engineer Intern, HP

- Reduced inference latency of image segmentation model by 90% , while also improving downstream classification model accuracy by 18.75%
- Fine-tuned Conditional DETR object-detection model for custom use case
- Helped guide dataset curation for training and testing of computer vision models

June 2025 - November 2025
40 hours per week
Corvallis, OR

AI & ML for Air Traffic Management Intern, NASA Ames Research Center

- Worked on representation learning system for historical air traffic management initiatives
- Co-authored and presented paper in [Digital Avionics Systems Conference 2025](#)
- Leveraged variational autoencoders (VAEs) and gated recurrent units (GRUs) to create compressed time-series embeddings for input into downstream classification and nearest neighbors models
- Developed interactive visualization application for subject matter experts to explore VAE latent space
- Recipient of Shining Star award, the highest honor given to NASA interns

January 2025 - May 2025
40 hours per week
Mountain View, CA (Remote)

Graduate Research Assistant, Oregon State University

- Developed computer vision system for wildlife detection and counting on camera trap images for Oregon Department of Transportation
- Model performance surpassed currently published state-of-the-art for camera trap wildlife counting

June 2023 - December 2024
20 hours per week
Corvallis, OR

Graduate Teaching Assistant, Oregon State University

- Guided undergraduate students during the development of their senior capstone projects using previous industry experience

Sept 2022 - June 2023
20 hours per week
Corvallis, OR

Software Development Engineer II, Amazon

- Project lead for 8 person team working on a multiyear initiative to rearchitect a business critical, monolithic backend service into microservices
- Collaborated across multiple teams for extensive research and design on long-term architectural vision
- Became a subject-matter expert for business domain and provided feedback for others working in the area through design reviews, code reviews, and weekly office hours
- Improved service caching and thread pool tuning
- Provided mentorship through weekly meetings with junior software development engineers

Oct 2021 - Sept 2022
40 hours per week
Seattle, WA

Software Development Engineer I, Amazon

- Worked closely with business team to design components for legacy Java service that met business requirements while also reducing latency and removing technical debt
- Rewrote build system in Gradle to reduce build times by 50% and save four plus hours of cumulative engineer time per day
- Served as a dedicated mentor for two interns and onboarded several new hires onto the team
- Delivered time sensitive changes to unblock multiple major project launches

July 2019 - Oct 2021
40 hours per week
Seattle, WA

Software Development Engineer Intern, Amazon

- Developed Ruby on Rails and SQL system for Amazon Music playlist curators
- Tool enabled curators to automate the generation of playlists using historical customer listening data
- Communicated with a wide range of stakeholders to design a streamlined system that reduced a partnering team's weekly workload by 37 hours

May 2018 - Aug 2018
40 hours per week
Seattle, WA

Athletic Academic Services Tutor, Clemson University

- Tutored student athletes in discrete mathematics, computer organization, and business calculus

Jan 2018 - May 2018
10 hours per week
Clemson, SC

Undergraduate Teaching Assistant, Clemson University

- Assisted during labs for Software Development Foundations
- Graded exams and lab assignments

Aug 2017 - Dec 2017
10 hours per week
Clemson, SC

Software Engineering Intern, Avid Technology

- Worked on team responsible for Pro-Tools, industry standard for digital audio workspaces
- Developed C++ application using JUCE framework

June 2017 - July 2017
40 hours per week
Berkeley, CA

Education

MEng Oregon State University, Computer Science

- GPA: 4.00/4.00
- Coursework: Deep Learning, Machine Learning, Geometric Processing, Algebraic Topology, Differential Geometry, Topological Data Analysis (TDA), Scientific Visualizations, Algorithms, High-level Synthesis (HLS), and Theory of Computation

2022 - 2025
Corvallis, OR

BS Clemson University, Computer Science

- Graduated Magna Cum Laude and a member of the Honors College
- GPA: 3.92/4.00
- Minor in Mathematical Sciences
- Scholarships: Palmetto Fellows, Presidential Scholarship, Clemson Scholar

2015 - 2019
Clemson, SC

Technical Skills

Languages: Java, Python, C++, C, R, Ruby, JavaScript, HTML, CSS

Machine Learning Libraries: PyTorch and TensorFlow

Databases: SQL and NoSQL

Cloud Computing: Familiar with AWS tools: Lambda, DynamoDB, S3, API Gateway, CloudFront, CloudFormation and CDK

Graphics: OpenGL and Blender

Application Development: Qt and JUCE

Continuous Integration and Continuous Deployment: pipelines, unit testing, integration testing, functional testing, stress testing and canary testing

Software Development: object-oriented programming, design patterns and multithreaded computing

Hobbies

Backcountry Skiing: AIARE - Level 1 Avalanche Training

Mountain biking: Treasurer for the Oregon State University Cycling Club
